That's a great idea - do you know which pole(s) the photo cell is on? Or is there one on each pole? Thanks.

GAVIN: This may be the best solution. We will just need to make sure the photo cells are uncovered once it gets dark.

I'll get back to you with the location(s) of the photo cell(s).

Hello All,

Just wanted to follow up as we have not heard anything regarding the overhead lights for June 7th. We wanted to know if we can make sure those light are turned on at least an hour before it gets dark on the 7th. We have a dusk shot and wanted to know if we could have the lights turned on for the shot.

If there are any costs associated to this please let me know. We are happy to compensate for time.

Any information or advice would be appreciated.

Best Gavin

Ms. Parker at PBID can give you the most current information on controlling the overhead lights on the street (I have copied her).

Eric

I believe those are controlled either by the business improv't dist (Eric
Eisenberg is pres.) or the chamber of commerce, and Eric can put you in
touch with someone there.

Thx.

Hi Lee

Do you know who controls the light hanging over the street ?

Thx

Hi Lee,

Not sure what happened. I sent this yesterday. Any questions let me know.

Please find attached the signed document for the shoot.

Exterior lights. Looks like we will shoot into dusk so it would be great
to have the exterior light on.

Eric got back to us and reduce the rate form $2,500.00 to 1K. We were
happy about this.

Best gavin
